

# TECHNICAL DATA SHEET MAFH

## NEW GENERATION

The new generation of processors has been designed from the ground up to be extremely rigid and offer great strength. All bases have been optimized by the final element analysis method to obtain the most compact and rigid designs possible; Manufacturing processes have been improved, maintenance and service have been simplified. In addition, the machines of the new generation come from the factory with LCD monitor. All our machines are available with option to electric motor, diesel engine or cardan for tractor power take-off, automatic, semi-automatic or manual cutting processes and high pressure cooling systems.

Manufactured in GSP by MAFH, the new generation of wood and biomass processor, the most complete service and assistance system in the sector

## ABOUT US

Mecánica MAFH is a family business founded in 1990, mainly dedicated to the mechanization of high precision parts in lathes and CNC centers, with the years opting for the manufacture of woodworking machinery. In its beginnings MAFH produced machines.

Profiles edgers, and then agricultural and forestry machinery for the processing of firewood, offering quality and large productions.

MODEL	ED-70	EM-80	EM-90
CUTTING DIAMETER	40CM	50CM	60CM
SCREW DIVIDER	2,4,6	2,4,6,8	2,4,6,8
ELECTRIC MOTOR	60HP		
DIESEL ENGINE	100HP		120HP
HYDRAULICS	SI	SI	SI
CUTTING DISC DIAMETER	1000	1300	1500
LOADING TABLE	SI	SI	SI
TAPE TRANSPORTATION	SI	SI	SI
TOUCH SCREEN	SI	SI	SI
JOYSTICK	SI	SI	SI
BARRERA LASER SECURITY RAJADORA	SI	SI	SI
MAX DIAMETER WOOD SCRAPER	40CM	50CM	60CM
WOODEN LENGTH	100CM	100CM	100CM
HYDRAULIC FORCE RAJADORA	26TN	36TN	42TN
CUTTING CYCLE TIME	2` `	3` `	4` ` seconds
APPROXIMATION TUBE	<b>480CM</b>	600CM	600CM
